Warrego Valles: BOTOX

out 1.march, 2018

Stylistically, the music on **Botox** - a debut full length for Warrego Valles - seems to draw influences from a deep underground electronic dance music, but it is based on its contemporary deconstruction, which results in a dark minimalist abstract post-genre electro and glitchy sonic landscapes. The album's thematic undercurrents tell a story about the present times: ephemerality of all action and destruction of the planet due to climate change and slavery. *A grim vision of a world ruled by psychopaths driven by the will to control, greed and domination.*

Botox is released digitally via Kamizdat's Bandcamp with the 'name-your-price' free download option and all usual digital outlets. It will also be presented as a handmade numbered USB booklet in a limited run of 50. Released under a Creative Commons BY-NC-ND licence. See more at <https://kamizdat.bandcamp.com>

Warrego Valles will perform the promotional performance on the release day as a “*double bill*” concert where they will share the stage with world’s avantgarde electronic musician **Laurel Halo** - on March 1st - organized in collaboration with **Kino Šiška**.

Warrego Valles is the blending of two sonic psychonauts who produce exploratory electronic music with clear background in dark dancefloor aesthetics and subtle dashes of activist poetics. In 2017, they made quite a stir in the Slovene electronic music scene, within their audience, among colleagues and in the media. The members of the duo are producer **Nina Hudej**, who has recently been selected onto the 2018 list of musicians at the Creative Europe-supported **SHAPE** platform, and musician, vocalist and classically trained flute player **Nina Kodrič (NinaBelle)**. They are both established electronic music DJs, skilled producers and experienced musicians, who are also active as event managers and promoters of equal opportunities and diversity in electronic music, focused on presenting live alternative electronic acts in Ljubljana.
